# meteor

Ferrous color shades ranging from rust, bronze, chalk, and ancient whites. This is the pictorial essence of the glazes that mostly characterize the Meteor collection. Meteor is the ideal collection of contemporary flooring with a solid minimal profile that provides continuity with no interruptions from the night area to the day area of the home and extends into the bathroom and the kitchen. The modularity of the three sizes in conjunction with the octagon on a mesh makes Meteor an essential choice that offers an extremely versatile and expressive style aimed at obtaining excellent results in terms of aesthetics and resistance. As a wall covering solution, Meteor offers a particularly strong, yet warm and mild pictorial sensation, while at the same time producing a complete architectural ceramic project. By including the diamond listel on a mesh, Meteor represents a very complete collection which highlights its esthetical and decorative elements as well as its technical aspects.

Metall- und Eisen-Farben, Nuancen von Rost über Bronze bis hin zum alten Gipsweiß: die Glasur zeigt deren malerischen und stofflichen Ausdruck und dies charakterisiert die Serie Meteor. Eine ideale Kollektion für gegenwärtige Böden mit einem minimalen kräftigen Schnitt: vom Wohnbereich zum Schlafbereich, von der Küche bis zum Bad ohne Einschränkung. Das Modulspiel der 3 Formate, zusammen mit dem Achteck auf Netz, gestaltet Meteor zur einer wesentlichen, aber äußerst vielseitigen und ausdrucksvollen Serie, die optimale Ästhetik und Widerstandsfähigkeit gewährt. Die selben malerischen Effekte geben auch der Wand einen starken Ausdruck und vervollständigen die Verwendung der Keramik in der Architektur. Mit der Einsetzung der Leiste „listello diamante“ auf Netz und dem Passstück „Raccordo“ beweist die Kollektion Meteor sowohl ihren ästhetischen-dekorativen, als auch ihren technisch-strukturalen Wert.

Couleurs de métaux brossés et de fer aux nuances boisées allant de la rouille au bronze jusqu'au blanc de chaux et évocatrices de l'empreinte du temps : voici l'essence picturale de l'émail qui caractérise la collection Meteor. Une collection qui représente une solution idéale pour la réalisation de sols à la fois contemporains et fidèles à la créativité spontanée de la nature, apte à apporter une continuité d'atmosphère de la zone nuit à la zone jour de la maison en passant par la cuisine et la salle de bain. La modularité des trois formats et la présence d'un octogone sur filet font de Meteor un instrument unique pour la réalisation de sols à la fois essentielle et créative aussi bien du point de vue esthétique que du point de vue de la résistance. Dans l'utilisation murale la collection Meteor, ces mêmes effets de force picturale complètent le projet architectural céramique. L'introduction du listel diamant sur filet et de l'élément de raccordement fait de Meteor une collection très pointue sous l'aspect de l'esthétique et de la structure technique.

Colores metálicos y ferrosos, esfumaturas que van del herrumbre al bronce hasta el blanco yeso anticado: son la expresión pictórica y matérica del esmalte lo que mayormente caracteriza Meteor. Una colección ideal para pisos contemporáneos, connotado de un sólido tallo minimalista: de la zona día a la zona de noche, pasando de la cocina al baño sin interrupciones. El juego modular de los tres formatos unido a la presencia del octágono montado sobre red convierte Meteor en una serie esencial, pero extremadamente versátil y expresiva, capaz de llevar a óptimos resultados estéticos y de resistencia. A pared los mismos efectos pictóricos son de grande fuerza, y completan el proyecto cerámico en arquitectura. Con la introducción del listón diamante montado sobre red y del elemento de encastre, Meteor se convierte en una colección importante tanto desde el punto estético y decorativo como del técnico estructural.

Colori metallici e ferrosi, sfumature che vanno dal ruggine al bronzo fino al bianco gesso antichizzato: è l'espressione pittorica e materica dello smalto quello che maggiormente caratterizza Meteor. Una collezione ideale per pavimentazioni contemporanee, connotate da un solido taglio minimale: dalla zona giorno alla zona notte, passando dalla cucina al bagno senza interruzione.

Il gioco modulare dei tre formati, unito alla presenza dell'ottagono su rete, rende Meteor una serie essenziale ma estremamente versatile ed espressiva, capace di portare ottimi risultati estetici e di resistenza. Anche a rivestimento gli stessi effetti pittorici sono di grande forza, e completano il progetto ceramico in architettura. Con l'introduzione del listello diamante su rete e dell'elemento raccordo, Meteor è una collezione importante sia dal punto di vista estetico e decorativo che tecnico strutturale.
