

THE LOVE FOR “REAL CERAMICS” IN GLAZED  
TERRACOTTA FOR MORE THAN 50 YEARS

 **SENIo**  
alta ceramica faentina  
HAND  
✓ MADE IN ITALY

Ceramica Senio has been a manufacturing company of **Made in Italy** ceramic tiles, in glazed terracotta, for more than 50 years. The tradition and craftsmanship that make us different allow the **customization** of the product, in terms of sizes, shapes, colours and surface finishes.

Express your creativity by designing a **unique product** !  
The passion for what we do and our experience are at your service.

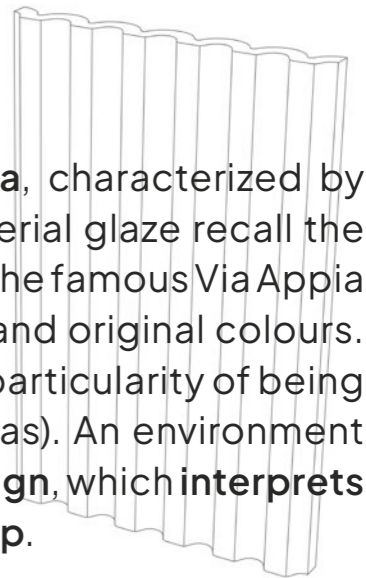

Our challenge is being interpreters, not only of tradition but also of contemporary design. We develop our collections with passion, starting from the study of **raw materials** and of the **colour range**, always going through new artisan **production processes**, up to the design of settings.

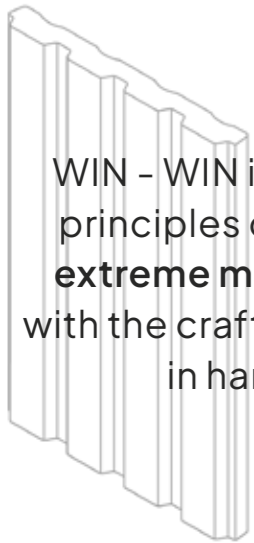

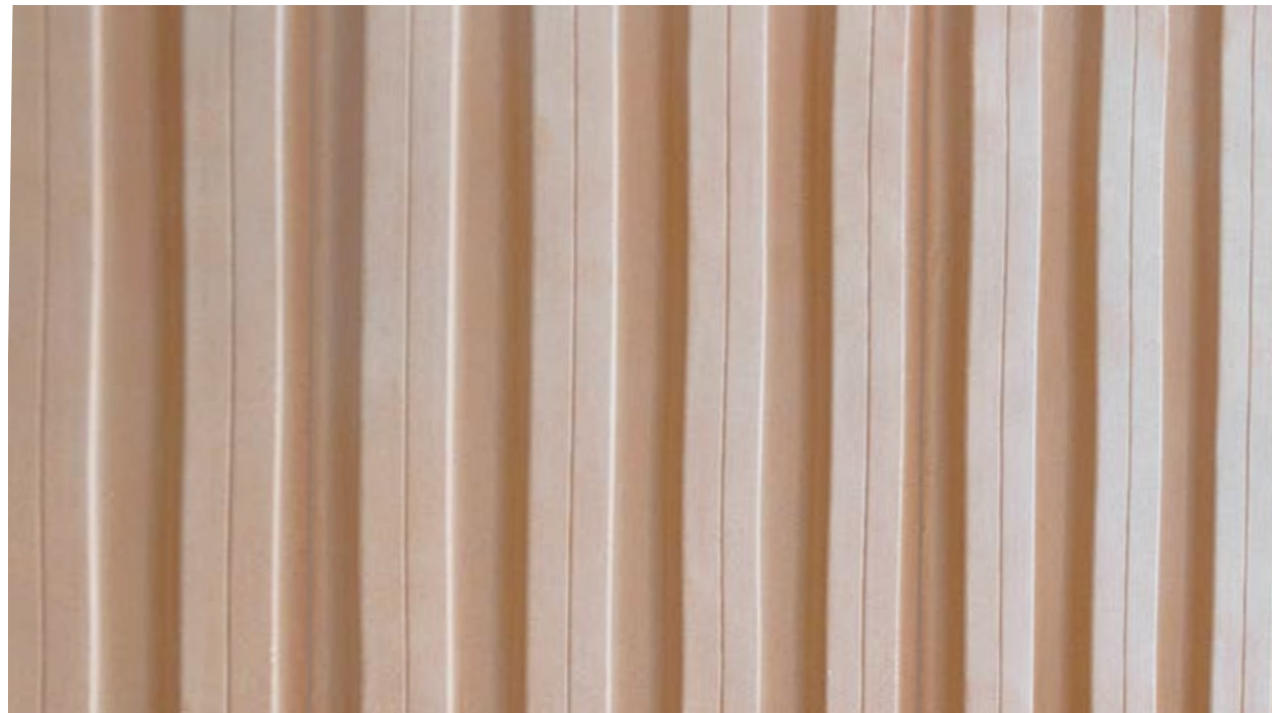

# Via Appia

VIA APPIA is a tile collection for cladding in **glazed terracotta**, characterized by sculptural **design in 3D shapes**. Its section and semi-matte material glaze recall the aesthetic language of the ancient Roman columns located along the famous Via Appia but embodying all the modernity of today, thanks to its refined and original colours. The main module is sized **20x30x2 cm – 8”x12”x0.8”** and has the particularity of being suitable for installations without joints and grout (except for wet areas). An environment covered with Via Appia is a stunning mix of **charm, history and design**, which **interprets the value of the past through a new contemporary craftsmanship**.

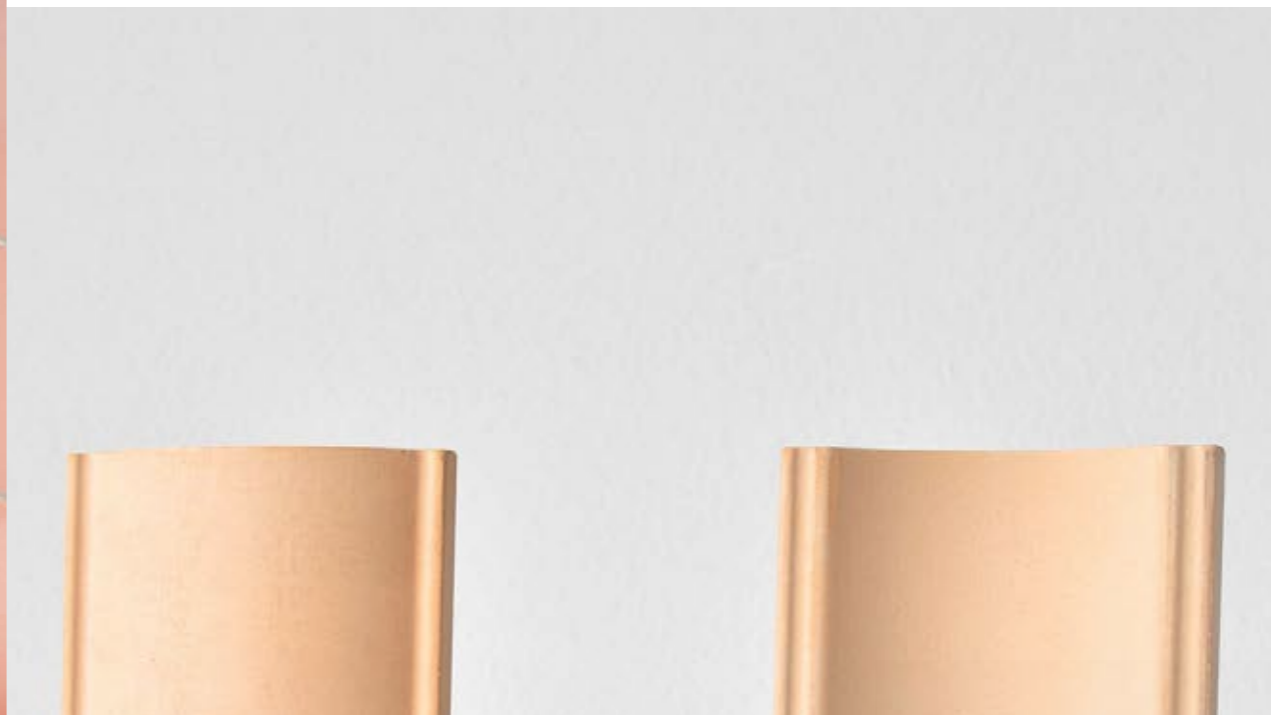

## WINWIN

WIN - WIN is a collection of **glazed terracotta** wall tiles inspired by the fundamental principles of the Bauhaus, such as **simplicity, elegance of colours** and shapes and **extreme modernity**. In the **WIN - WIN** series, the modern style of the shape merges with the craftsmanship of the opaque surfaces; everything is in balance and coexists in harmony, as the good design teaches! The main size of the collection is the **10x15 cm - 4"x6" rectangle** which develops in the **PLAIN** version and in the slightly three-dimensional version.

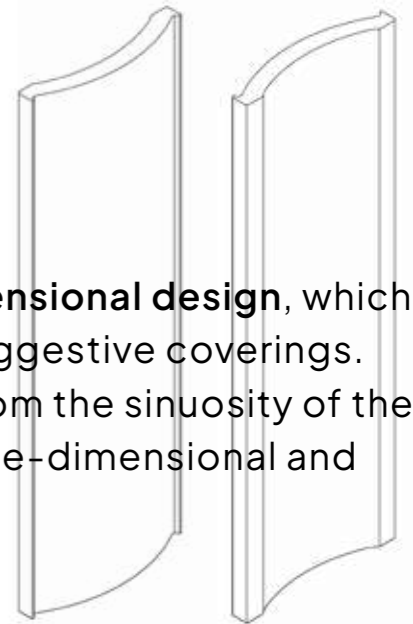

# duna

DUNA is a **glazed terracotta tile**, with a **soft and three-dimensional design**, which evolves into a “concave” and a “convex” shape, creating suggestive coverings. This delicate and embracing collection draws inspiration from the sinuosity of the desert sand dunes. The main sizes of this collection are three-dimensional and come in **41 colours**.

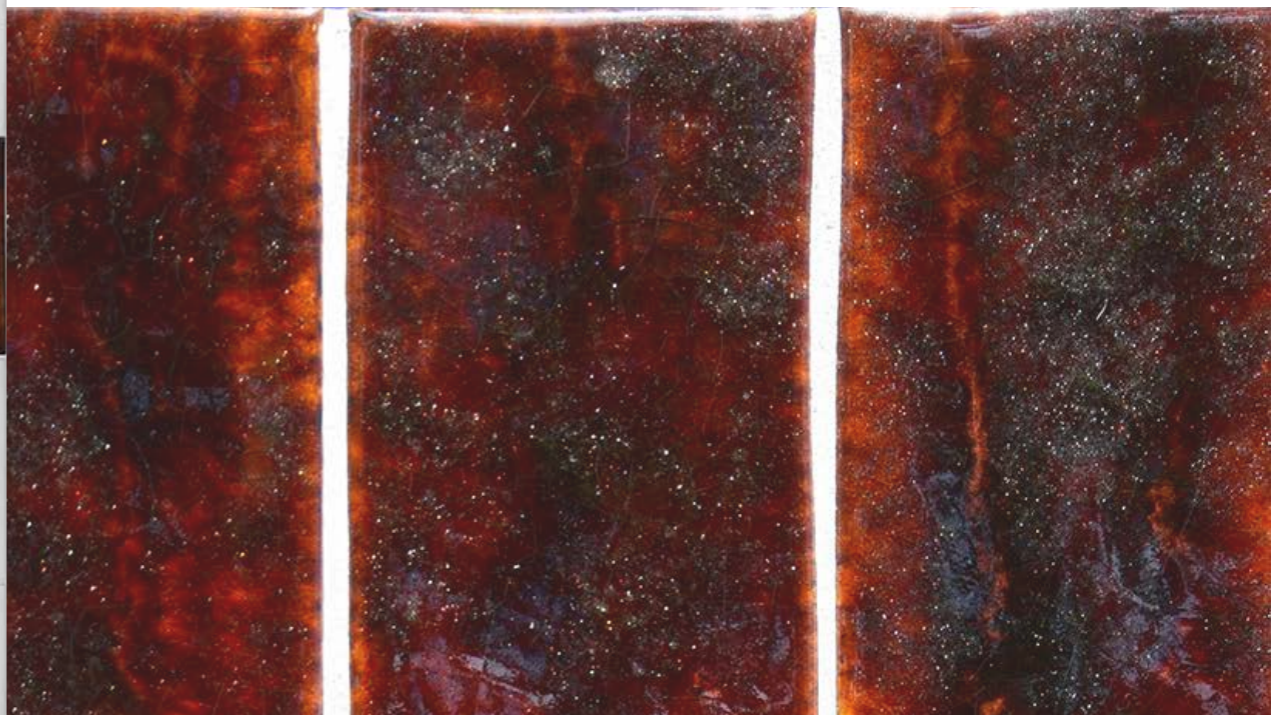

# Plissé

**PLISSÉ** is a **glazed terracotta** collection for cladding, with a **modern** and **three-dimensional design**. The collection is inspired by the pleated fabrics of high fashion and gives **elegance, rhythm** and **lightness** to the walls it covers. Plissé has the peculiarity of being suitable for installation **without joint** and plaster (except for wet areas).

# *Aromatica*

**Aromatica collection**, in white body double-firing, was born from the desire to pay homage to the beauty of nature by recalling the colours of herbs, flowers and aromas that plants give us. Its **12 colours** are made intense and deep by the transparency and brightness of the **glass grit** that characterizes them. The decorative effect of the glass is a particular type of **easily cleanable crackle glaze**, a plus of this collection. The design we propose is to mix colours and sizes, just as nature teaches. The standard format is **6,5x13 cm - 2,5"x5"**.

All the collections are enriched with mosaics of different sizes, infinite colours, decorations and surfaces, always made by hand, without the use of machines.

To embellish and refine a coating, we complete our collections with special pieces and moldings. Each **special piece** is initially designed and made by hand, just like a sculpture, and only afterwards, the molds are created for pressing.

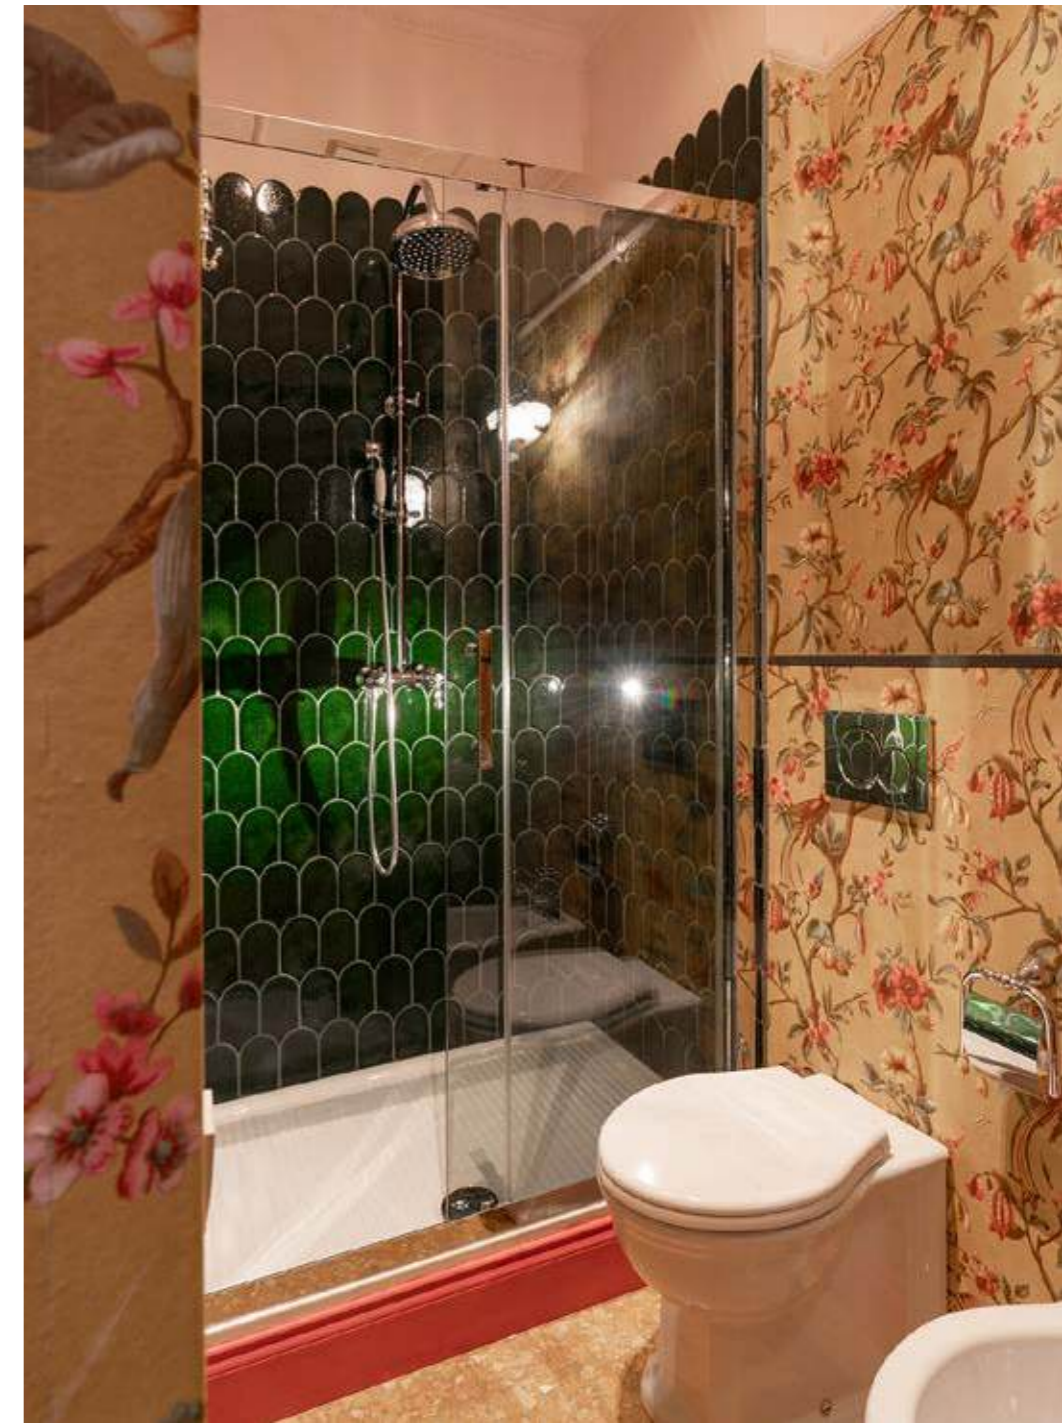

The special pieces can emphasize the covering, embellish it or simply finish it...
